

Filtered drinking water for all students.

Permanent hydration stations.

Access to safe drinking water is crucial for the learning environment, being properly hydrated aids the growing and learning mind and the overall health and wellbeing of students and staff. Our smart drinking stations incorporate digital monitoring to give you peace of mind that clean, fresh, safe drinking water is being dispensed at all times. With touch-free technology and a range of hygienic design features, you know you are providing a secure source of safe drinking water.

Our water stations are totally modular, you can customise each one to suit the precise needs of different locations. The life of our stations is also extended by simple and cost-effective maintenance protocols that are the same for every unit we make.

Our stations are sustainably manufactured with a focus on reducing your carbon footprint, lower demand for plastic bottled water and eliminate associated waste.

meetpat. education

Durable and robust.

meetpat's ground-installed design ensures a stable fixture suitable for permanent and long-term use. Made from the highest quality materials, our water stations are simple to service, and availability of spare parts means its a cost effective solution for the long term.

Indoor and outdoor.

Designed to withstand the harshest weather conditions, and treatment by the students, rigorous testing has proven a high level of durability. Long-term quality and performance is assured, even in challenging outdoor conditions.

Safe continuous hydration.

meetpat offers an uninterrupted water supply catering to the needs of pupils, staff and visitors into your school environment. Design features limit cross contamination and incorporate touch-free operation. Our products meet global plumbing certification.

Accessible hydration.

Permanent meetpat provides continuous, accessibility and DDA compliant hydration for the public. It becomes a reliable fixture, promoting hydration and serving as an essential school community resource for all.

Flexibility and customisation.

Our modular water stations can be customised to suit the precise needs of different locations. Style your water station how you like. Interchangeable graphic panels allow full customisation so they can be leveraged as an engaging medium to communicate key messaging to students and visitors alike.

Sustainable solution.

Our stations can contribute to your school or university's broader climate commitments. meetpat water stations accommodate a huge range of bottle shapes and sizes lowering demand for bottled water and reduce associated plastic waste and pollution.
