Wall Mounted **PM-RS-03-WM**

On Tap Advertising

Quick interchangeable graphic panels, customised to promote your brand or message. meetpat provide design support to help make the most of this vast branding space.

Accessibility Compliance

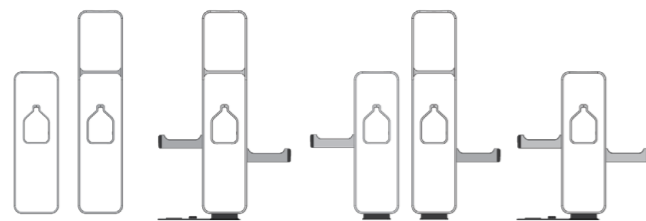

Thoughtful design, ensures accessibility for all. Single handed bottle refill, with touch-free activation. DDA/ADA certified drinking fountain accessory, allowing for multiple height configurations and braille instructions.

Live usage monitoring.

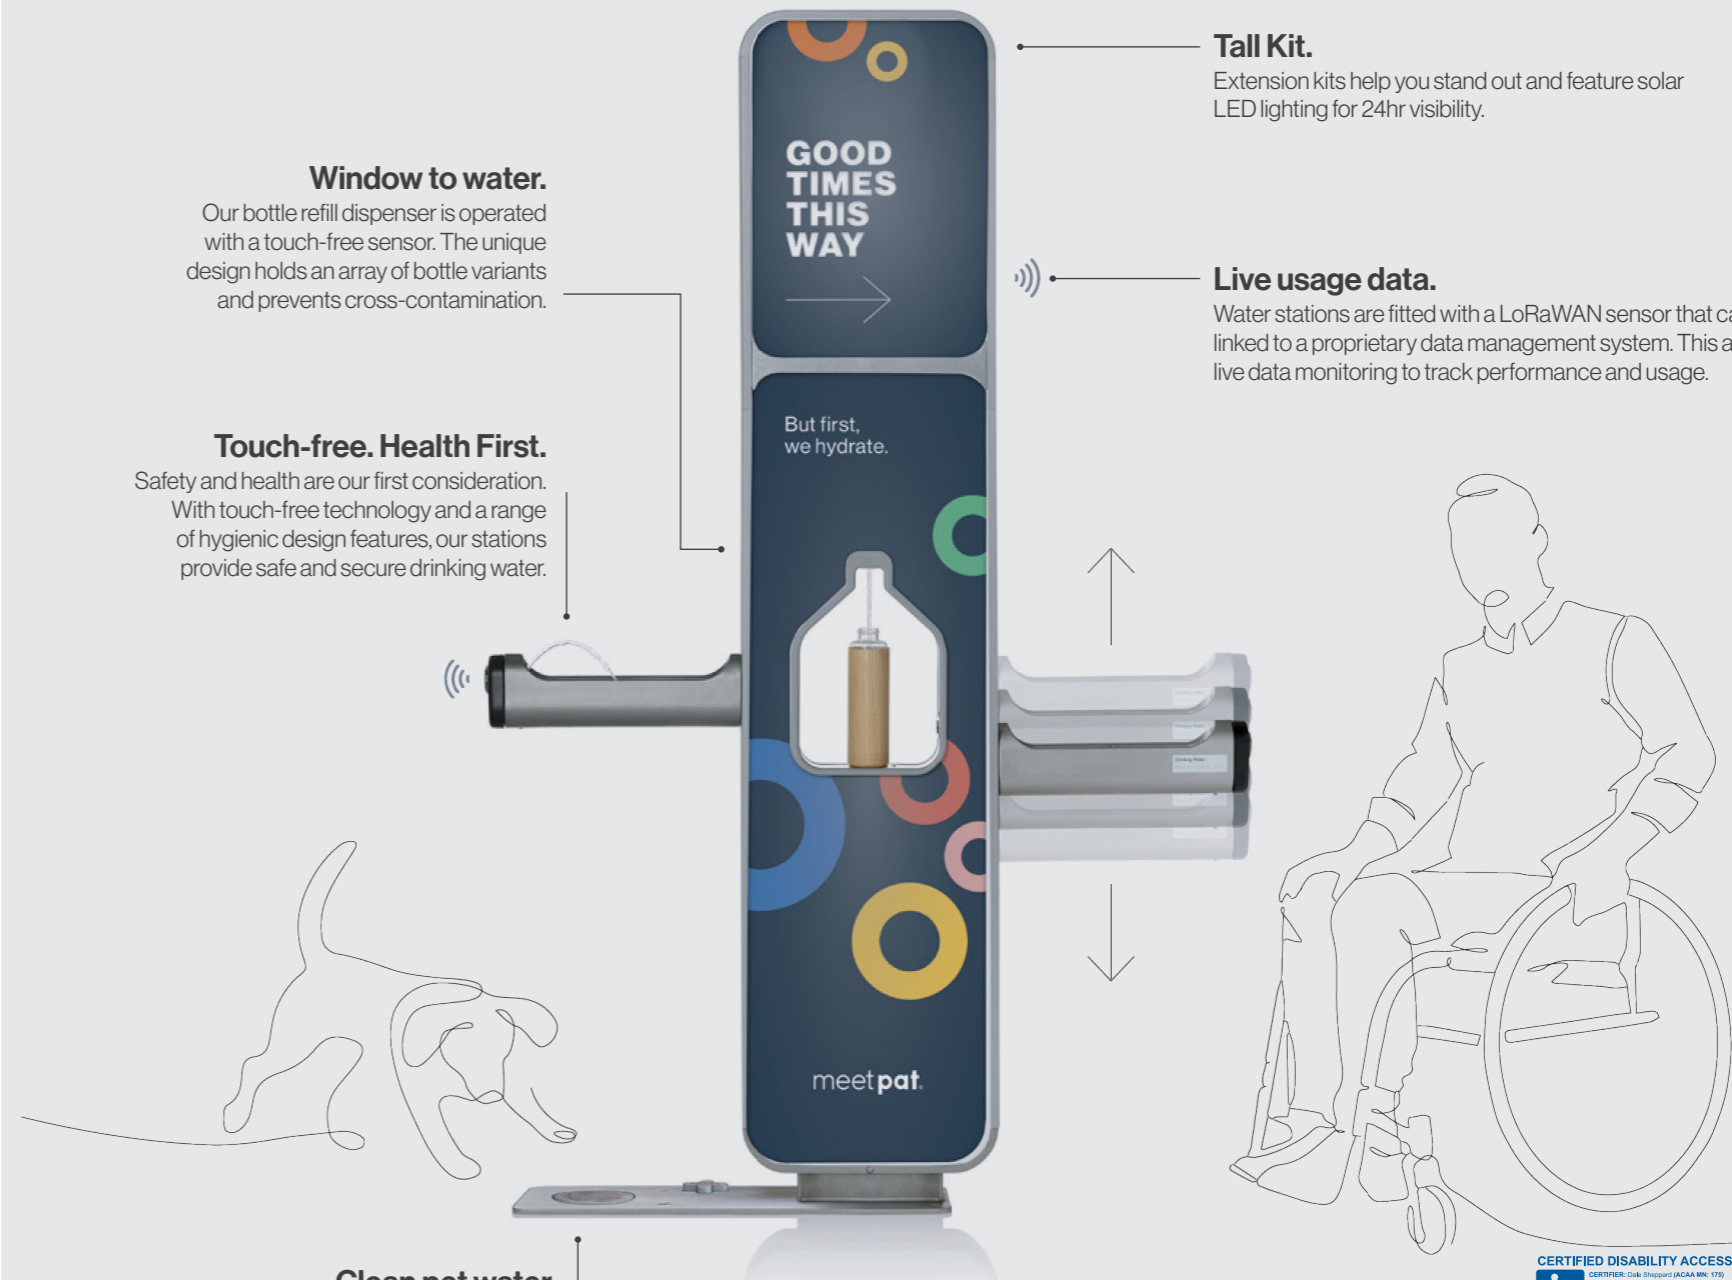

Customised with a premium water metering system. Enabling live tracking of water usage and performance. Linking back to a management system, which feeds into sustainability targets and maintenance recording.

Longevity.

Manufactured with premium materials and modular construction. Enabling cost-effective maintenance protocols extending the life span of the unit.

Multiple set up options & configurations available
Configure now - <http://meetpat.com/configure/>

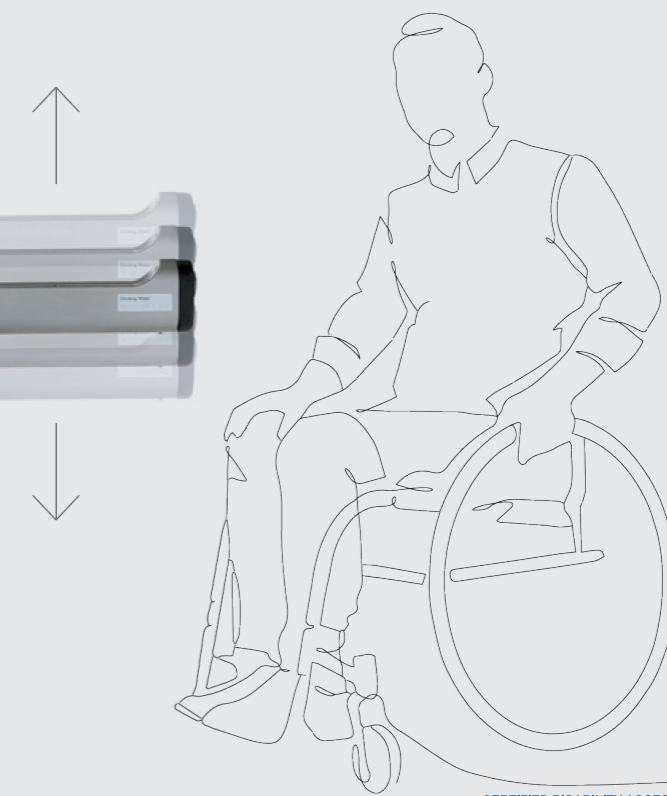

Window to water.
Our bottle refill dispenser is operated with a touch-free sensor. The unique design holds an array of bottle variants and prevents cross-contamination.

Touch-free. Health First.
Safety and health are our first consideration. With touch-free technology and a range of hygienic design features, our stations provide safe and secure drinking water.

Clean pet water.
Add a dog bowl to the base plate for fresh and clean pet water. The foot operated tap delivers a fresh serving of water each time, then self-cleans ensuring no stale water.

Tall Kit.
Extension kits help you stand out and feature solar LED lighting for 24hr visibility.

Live usage data.
Water stations are fitted with a LoRaWAN sensor that can be linked to a proprietary data management system. This allows live data monitoring to track performance and usage.

Accessibility for all.
Accessibility and DDA/ADA certified features include drinking fountain arms with multiple configurations, one-handed operation, adjustable heights and braille instructions.

Installation

Product Description	Order Code
Installation	MP-IN-01

meetpat will manage the full project from planning to execution. Giving you peace of mind that your assets are functioning correctly and allow you to take full advantage of their features.

Installation Inclusions

- ✓ Guidance in determining the optimal install location.
- ✓ All works carried about by licensed plumbers and technicians.
- ✓ Groundwork & preparation of the site in accordance with DDA requirements.
- ✓ Plumbing work.
- ✓ Ensure proper water connections & drainage.
- ✓ Online registration of the water station.
- ✓ Smart Meter installation ensuring the smart meter is connected and reporting data (pending connectivity).
- ✓ Functionality test ensuring everything works correctly.
- ✓ Final photo of the installed unit.

Pre-Installation Guide

Getting maximum impact, cost effectiveness and usage. When onsite determining a location, note these key points to ensure a cost effective and engaging install. For full instruction books, warranty and technical details, refer to www.meetpat.com

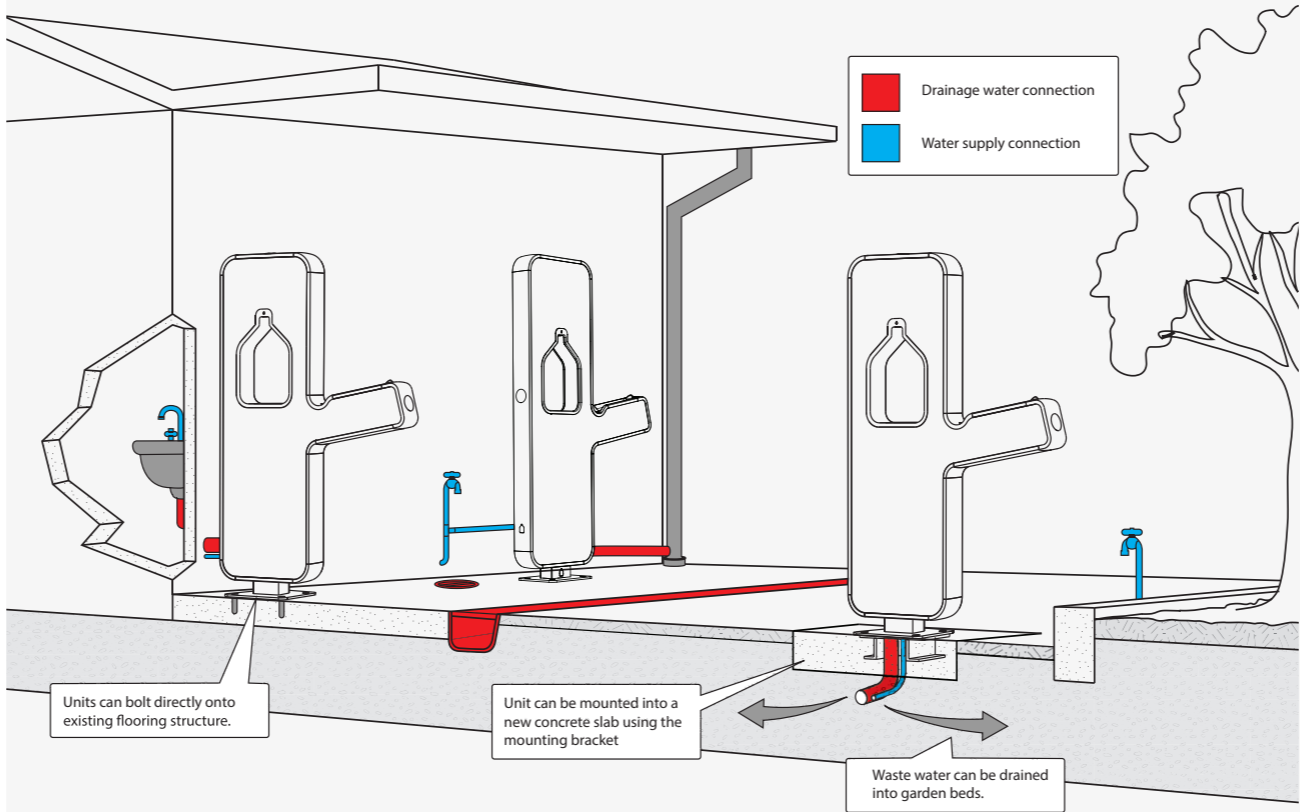

Public Access: Consideration is essential to ensure there is sufficient circulation space around the refill station for wheelchair & pedestrian access.

Sympathetic Locations: Choose high traffic areas, which are inspiring, clean and nice. Try to avoid areas next to toilets, bins and other less desirable locations.

Plumbing: Consider existing plumbing locations. General rule is; Closer to existing tap = cheaper install. Longer from existing tap = more expensive

Key factors influencing the cost of installation.

- ✓ Distance from existing water connection and drainage to unit.
- ✓ Length of any excavation/ trenching required.
- ✓ Paving, concreting or landscaping required after excavation.
- ✓ Any obstacles between water source and unit (eg. trees, roads, buildings)
- ✓ Any additional council regulations.

Engaging meetpat for Maintenance.

meetpat is proud to introduce our new onsite service offerings, designed to provide our customers with hassle-free maintenance and expert care for your permanent water stations.

Optimal Performance & Presentation

Well-maintained water stations reflect positively on your brand and representation in market. Keep your units looking & functioning their best to allow for hygienic drinking water and a positive experience for every user.

Cost Savings

Get the most out of your investment. Regular servicing helps you avoid expensive repairs by catching issues early and keeps your unit within warranty.

Expert Service & Qualified Technicians

Your unit will be serviced by a meetpat qualified technician, ensuring each unit functions to our standards. All replacement parts are provided directly from our factory, ensuring every unit is fitted correctly and cost-effectively.

Comprehensive Reports & Database

At the completion of the service project, we will provide a full report to support you in keeping track of your fleet's history and activity into the future. No more coordinating with third-party contractors – our meetpat experts will handle everything, ensuring your units are clean and functional to continue our journey to provide safe drinking water for all.

Need help with installation?

Our expert team can assist, plus we also offer:

- ✓ Clean all external surfaces of the unit.
- ✓ Basic inspection of unit and functionality.
- ✓ Supply of before and after photo.
- ✓ Remove and dispose of old panels while installing new panels.

We design and manufacture the world's best drinking fountains and bottle filling stations.

Why meetpat?

Our products meet global plumbing certification and disability certification. Design features limit cross contamination and incorporate touch-free operation. Units can be monitored for usage and quality.

Our products are consistent with easy-to-use functionality. Water stations are customisable with unique branding to create consistent, sympathetic and identifiable access points.

It's tap backwards and we want you to choose tap over single use packaged water.

Made from the highest quality materials, our water stations endure the harshest weather conditions (and human treatment). Modular construction offers cost-effective maintenance protocols extending the lifespan of the unit.

Our modular water stations can be customised to suit the precise needs of different locations. This gives you the flexibility to invest only what you need, avoiding under-utilised standard units.

Our water stations lower demand for bottled water and reduce associated plastic pollution. Our enterprise offsets carbon through Reforest Australia and contribute 1% revenue to 1% for the Planet.

A company with purpose.

Our mission is to deliver innovative, safe drinking water solutions while contributing to sustainable impact for people and the planet.

We adhere to a philosophy of balancing purpose and profit. We are a proud B-Corporation, member of 1% for the Planet as well as supporters of the Bob Brown Foundation, Seed Mob, Farmers for Climate Action and Reforest Australia.

By supporting meetpat, you are proudly contributing to your ESG goals, helping to lead environmental sustainability and social responsibility as well as generally just doing great, we thank you.
