Kardinia Park

Total Usage **20,000 litres**

Health and environmental impact.
Using a meetpat has helped avoid the consumption and use of the following:

 2,120 Kg of sugar	 33,333 600ml Bottles	 3,180 Kg of CO2
--	---	--

Through adopting meetpat products you're helping to lead environmental sustainability and social responsibility.

A company with purpose.

Our mission is to deliver innovative, safe drinking water solutions while contributing to sustainable impact for people and the planet.

We adhere to a philosophy of balancing purpose and profit. We are a proud B-Corporation, member of 1% for the Planet as well as supporters of the Bob Brown Foundation, Seed Mob, Farmers for Climate Action and Reforest Australia.

By supporting meetpat, you are proudly contributing to your ESG goals, helping to lead environmental sustainability and social responsibility as well as generally just doing great, we thank you.

To date we have planted

1,736 trees

restoring 1.7 hectares of habitat and removing

399.1 tonnes

of co2 with our partner

Reforest

We design and manufacture the world's best drinking fountains and bottle filling stations.

Why meetpat?

Safe.

Our products meet global plumbing certification and disability compliance. Design features limit cross contamination and incorporate touch-free operation. Units can be monitored for usage and quality.

Longevity.

Made from the highest quality materials, our water stations endure the harshest weather conditions (and human treatment). Modular construction offers cost-effective maintenance protocols extending unit life.

Consistent.

Our products are consistent with easy-to-use functionality. Water stations are customisable with unique branding to create consistent, sympathetic and identifiable access points.

Flexibility.

Our modular water stations can be customised to suit the precise needs of different locations. This gives you the flexibility to invest only what you need, avoiding under-utilised standard units.

Why pat

It's tap backwards and we want you to choose tap over single use packaged water.

Sustainable.

Our water stations lower demand for bottled water and reduce associated plastic pollution. Our enterprise offsets carbon through Reforest Australia and contribute 1% revenue to 1% for the Planet.

Our range

PT-RS-03
Portable Bottle Refill Station

PM-RS-03-WM
Wall Mounted Bottle Refill Station

PM-RS-03-GM
Ground Mounted Bottle Refill Station with

Sectors

Events

Supporting the world's biggest events with portable hydration stations.

meetpat's portable water stations are designed for events and projects with challenging water needs. Effortlessly move the units around, connect multiple units together to create a water bank, all ensuring the best hydration solution is available. The world's easiest hydration product to install, just connect to a standard mains water tap, and you're ready to provide refreshing hydration.
