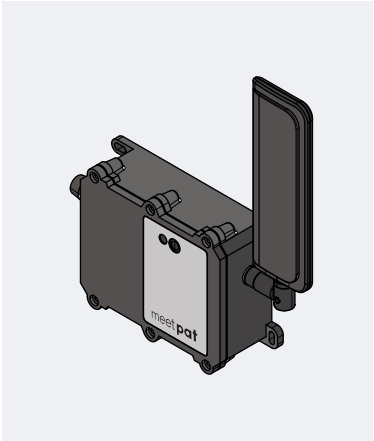
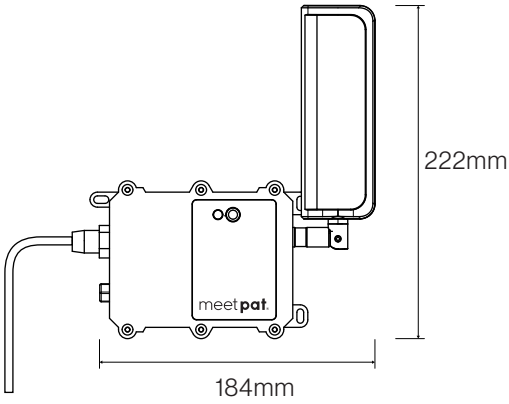
meetpat®





meetpat - Smart Water Meter - Gen2

Water monitoring. Simple, connected and easy to understand.
The new meetpat smart meter brings the next generation of monitoring to your water station, using a SIM-based 4G connection to send water-use data to an intuitive dashboard. Multiple reports each day help you understand how your station is used, wherever you are. With five-year battery life and a robust, IP-rated enclosure, it's designed for outdoor public spaces and easy ongoing monitoring.
